Oregon Public Health lifts advisory for the main pond in Golden Gardens Park:

Reduced blue-green algae levels confirmed in Lane County park

A health advisory prompted by high algae levels found in the main pond in Golden Gardens Park located in northwest Eugene, north of Barger Drive, was lifted today by Oregon Public Health and Lane County Health Department officials.

The advisory went into effect Aug. 5, 2010.

Water monitoring has confirmed reduced levels of blue-green algae that can produce toxins harmful to humans and animals.

These reduced levels are not likely to be associated with dangerous toxin concentrations in the water, according to World Health Organization guidelines.

Oregon Public Health advises people who recreate in Oregon water bodies to always be alert to signs of algae blooms. People and their pets should avoid water contact if there are visible clumps of algae in the water.

For local information contact the natural resources coordinator with City of Eugene Parks and Open Space Division at 541-682-4925.

For health information, contact the Oregon Public Health Harmful Algae Bloom Surveillance program at 971-673-0400 or www.healthoregon.org/hab; also contact the Oregon Public Health toll-free information line at 1-877-290-6767.
